

Green  
is nothing  
new to us...

For more than two decades, Chem-Dry, the No. 1 rated carpet cleaning franchise and world's largest carpet cleaning company, has been cleaning with a safe and non-toxic solution that uses approximately one-fifth the water of steam cleaners.

Our process is copied from Mother Nature to refresh and deep clean your home's carpets without harsh chemicals.

# The greener carpet cleaner

All of the ingredients of The Natural<sup>®</sup>, our proprietary cleaning solution, are on the FDA's\* G.R.A.S.\* list. You would not add soaps, detergents, phosphates or other harsh chemicals to our air, lakes, streams or forests; so why add them to your carpet?

Our dedication to being green is more than just words. In fact, we use one-fifth the amount of water during our cleaning process compared to steam cleaners. And, our powerful, proprietary extraction equipment ensures that carpets are dry in just 1-2 hours. Less water in your carpets means a healthier home for your family and leaves more water in our reservoirs.

## GREEN CERTIFIED

The requirements to become Green Certified consist of numerous tests that are conducted by an independent organization to measure the degree a substance is harmful.

These tests evaluate the product's impacts against Oral Toxicity, Dermal Toxicity, Aquatic Toxicity and Air Quality.

\*Food & Drug Administration  
 \*\*Generally Recognized As Safe

# Chem-Dry's green certified products
