Deep Cleaning, Fast Drying

Only Chem-Dry offers a carbonated-cleaning process that will have your upholstery sparkling clean and **dry in one to two hours instead of one to two days.**

Chem-Dry uses less water than other processes, minimizing drying time and reducing the chance of mold, mildew, and bacteria growth. Millions of tiny effervescent bubbles burst dirt and stains from your upholstery fabrics, lifting them to the surface where they are thoroughly extracted. Chem-Dry's safe, non-toxic solutions actually help your fabrics stay as clean as when they were new.

Chem-Dry Offers Unique Advantages

- Safe for all kinds of upholstery, including some of the finest natural fibers and the hardest synthetics.
- Safe for children and pets.
- A money saver because Chem-Dry leaves no dirt-attracting residues which can prematurely re-soil your upholstery.
- Great for auto interiors, boat interiors, office dividers or any upholstered item!
- Chem-Dry's Fabric Protector protects your upholstery by forming a water and oil repellent barrier on the surface of your upholstery material.

An Invisible Shield

Upholstery Fabric Protection Available

Fortify your furniture's ability to stand up to life's unexpected messes by protecting it with Chem-Dry's Fabric Protector. A small investment in this invisible shield will add great value in the long run.

Impressive Results

Don't wait another day. Have your furniture deep cleaned with Chem-Dry and your family will enjoy a fresher, cleaner home.
